

In order to provide the best quality health outcomes for members and cost-effective care delivery, we at UnitedHealthcare routinely review utilization patterns along with the latest literature around procedure code usage and efficacy.

UnitedHealthcare recently updated claim edits to prevent unbundling and inappropriate code submissions. These edits are expected to have a minimal impact to the following codes: D4355, D1110, D0230-D0251, D0272-D0277, D0330, D3120, D0140, D9995, D9996, D9910, D9215, D0431, and D0120. All claim edits are designed to work in conjunction with member benefit plan set-up and should have no impact on routine claims and estimates that are submitted correctly as per clinical and plan guidelines.
